New Miniature Plastic Control Valves Announced

Designers now have a multitude of options with a new series of plastic control valves from Industrial Specialties Mfg, Inc.

Produced for air, vacuum or liquid service, these lightweight valves are available in a selection of colors to enhance cosmetics and provide an easy way to identify valve functions.

These chemically resistant, corrosion-free valves offer 2 and 3 way functions and are provided in standard nylon with optional body materials available.

Actuated by toggle, button or roller, standard threads are 10-32 female. They can be adapted to 1/4-28, 1/16 or 1/8 threads or barb sizes from 1/16 to 1/4 I.D.
