Plastic Tank/Reservoir

Breather Introduced

A series of plastic breathers with removable snap-off caps are available from Industrial Specialties Mfg., Inc.

The caps facilitate servicing and prevent the intake of contaminants into reservoirs and containers.

The breathers are available in 1/4", 3/8" and 1/2" male thread or 1/8" and 1/4" female thread. Panel mounting options are also available.

The standard breather is made of nylon with a 48 micron screen. Vinyl caps can be color coded to identify systems or match machinery.

For further information, contact: Industrial Specialties Mfg., Inc., 2741 W. Oxford, Unit #6, Englewood, CO 80110. Phone: (303) 781-8486. FAX: (303) 761-7939.
