Kwik-Klik!

Plastic Quick-Connect Fittings

A new series of unique, lightweight ABS plastic quick couplers feature an ergonomic design with a large guarded button for fast, easy connect/disconnect.

The spring loaded socket clicks when secure and the thumb disconnect button is easy to activate even with gloves.

Interchangeable with industry standard connectors, the Kwik-Klik! features an unimpeded flow path and includes a lubricated Buna-N seal and stainless steel spring. The plug can rotate to prevent kinking and color coding is available for identification.

Able to withstand tens of thousands of cycles, these rugged connectors are available in 1/16 through 3/16 I.D., 10-32 through 1/8 NPT and special Y, luer, multi-barb or panel mount ends with up to 5 connections.
