## **New Pick-Up Suction Line Strainers Available**

A selection of corrosion-free plastic filters from Industrial Specialties Mfg., eliminate contamination on pick-up lines for air, vacuum, liquid or oil applications.

Effective in protecting pumps on any downstream device, the unique filter design prevents clogging or blockage.

They are available as either fixed filter assemblies or units that can be quickly changed for filter cleaning or replacing.

The “mini” series offer filter media in 5, 10, 20, 48, 74 and 130 micron screens. The “maxi” series are available in 5, 10, 35, 65, 74, 250, 270 and 500 micron screens. Standard screens are nylon, 270 micron is polypropylene. Filters are color-coded to quickly identify micron size.

Fittings can be provided with barb, threads, bulkhead, couplers or any combination - in plastic or metal housings. The company can also manufacture to specific requirements. Samples are available.

For further information, contact: Industrial Specialties Mfg., Inc., 2741 W. Oxford, Unit #6, Englewood, CO 80110. Phone: (303) 781-8486. FAX: (303) 761-7939.
