Push-to-Connect In-Line Filters Introduced

Exclusively available from Industrial Specialties Mfg, this exciting, new line of in-line filters can be easily connected and disconnected for service on tubing applications. Designed with John Guest® push-to-connect style fittings integrated into the Celcon® plastic filter housing, this unique in-line filter product line offers versatility and customization for a variety of applications.

Available in micron sizes ranging from 20 to 250 micron and end connections in any one of three standard tubing O.D. sizes: 1/4", 5/16" and 3/8", the product can be easily tailored to meet specific performance requirements for air, vacuum, and some fluid applications.

More product information is available by contacting Industrial Specialties Mfg., Inc., 4091 S. Eliot St., Englewood, CO 80110. Phone (800) 781-8487. Website: <http://www.industrialspec.com>, e-mail: sales@industrialspec.com
