## **New Pick-Up Filters Remove Particles At The Source**

A broad, new line of plastic suction strainers/pick-up filters providing filtration at the source has been introduced by Industrial Specialties Mfg.

Ideal for reservoirs, bottles or other liquid containers, the all plastic construction is extremely durable and prevents chemical contamination. Applications include: consumer spray bottles, medical/pharmaceutical, general industrial, chemicals, coolants and lubricants.

These versatile strainers are available in a wide range of styles, sizes, configurations, materials and micron sizes. Styles include: cylindrical, flat bottom or raised bottom and connection options include hose barbs or male NPT threads. Bottom and side inlets are also available and the company can produce unique styles to meet end user specifications.

All products are produced and shipped directly from Industrial Specialties to save both time and expense.

Detailed product literature and free samples are available upon request.
